

pig'tech[®]

HBN (Health by Nutrition)

WHAT IT IS:

Cargill PigTech[®] HBN (Health by Nutrition) is a highly palatable and digestible diet designed to support pigs during the weaning transition. It contains milk components, cooked cereals, specialty protein concentrate, organic acids, phytogenic substances, yeast culture, and bacillus fermentation ingredients. This diet is ideal for use as a creep feed starting 7 days before weaning and continuing up to 14 days post-weaning.

Let's solve challenges together.
